Transport & cities · Product concept

University transport payment concept

The Pars Hadish university transport payment concept provides a way to collect and track university shuttle fares by route and work shift.

Conceptual product illustration. No real customer information is shown.

From understanding the problem to product development

Areas covered

- ✓ Payment association with route and shift
- ✓ Fare payment request
- ✓ Payment status display

How it works

1. Start a shift
2. Submit payment
3. Resolve the result

The requirements and delivery scope of each project are defined with the organisation that will use it.

Discuss this solution

If you are building a product or rethinking an operational process, we can discuss the scope and how to approach delivery.
