Transport & cities · Solution overview

Fleet management and driver assistant

The Pars Hadish fleet management and intelligent driver assistant solution is designed to coordinate drivers' activities, monitor bus movements, manage fare payments, and review fleet performance.

Conceptual product illustration. No real customer information is shown.

From understanding the problem to product development

Areas covered

- ✓ Driver and shift management
- ✓ Fleet tracking
- ✓ Service scheduling

How it works

1. Start a shift
2. Monitor movement and fares
3. Review performance

The requirements and delivery scope of each project are defined with the organisation that will use it.

Discuss this solution

If you are building a product or rethinking an operational process, we can discuss the scope and how to approach delivery.
