Payments · Solution overview

Payment switch

The Pars Hadish payment switch receives, routes, and processes payment requests and connects terminals, gateways, and financial services.

Conceptual product illustration. No real customer information is shown.

From understanding the problem to product development

Areas covered

- ✓ Receive and route payment requests from connected terminals and gateways
- ✓ Support purchase, purchase confirmation, purchase reversal, and balance inquiry processes
- ✓ Define and manage merchants and their terminals

How it works

1. Payment request
2. Check payment rules
3. Return the result

The requirements and delivery scope of each project are defined with the organisation that will use it.

Discuss this solution

If you are building a product or rethinking an operational process, we can discuss the scope and how to approach delivery.
