Healthcare · Solution overview

Intelligent polyclinic appointment and queue management system

The Pars Hadish intelligent polyclinic appointment and queue management system manages appointments, organizes waiting queues, and coordinates patient reception and service delivery in healthcare facilities.

Conceptual product illustration. No real customer information is shown.

From understanding the problem to product development

Areas covered

- ✓ Appointment management
- ✓ Patient check-in
- ✓ Waiting queue management

How it works

1. Check in
2. Queue and call
3. Complete the service

The requirements and delivery scope of each project are defined with the organisation that will use it.

Discuss this solution

If you are building a product or rethinking an operational process, we can discuss the scope and how to approach delivery.
