Transport & cities · Solution overview

Smart parking

The Pars Hadish smart parking management system manages vehicle entry and exit, calculates parking charges, and tracks payments through a central panel.

Conceptual product illustration. No real customer information is shown.

From understanding the problem to product development

Areas covered

- ✓ Automatic vehicle movement recording
- ✓ Capacity monitoring
- ✓ Tariff definition

How it works

1. Record entry
2. Calculate parking fees
3. Payment and exit

The requirements and delivery scope of each project are defined with the organisation that will use it.

Discuss this solution

If you are building a product or rethinking an operational process, we can discuss the scope and how to approach delivery.
