Detailed product introduction

Electronic wallet

Product introduction

The Pars Hadish electronic wallet manages users' account balances, records deposits and withdrawals, and tracks their history.

This solution helps organizations review and manage users' wallet balances in a management panel. Authorized staff can find an account, view its balance, and record a deposit or withdrawal. Operations are also visible in the account statement so that changes in the balance can be tracked.

Detailed product introduction

Electronic wallet

Product introduction (continued)

For example, recording a deposit increases the wallet balance, while recording a withdrawal reduces it. Finance staff can review the account statement to identify which operation caused each change in balance. Funding methods and conditions of use are determined according to each organization's needs.

Electronic wallet

Product features and capabilities

Wallet list

View the account number, associated organization, account type, active status, and balance.

Account search and filtering

Find an account using the details and filters available in the panel.

Wallet deposits

Record a deposit amount to increase the selected account's balance.
